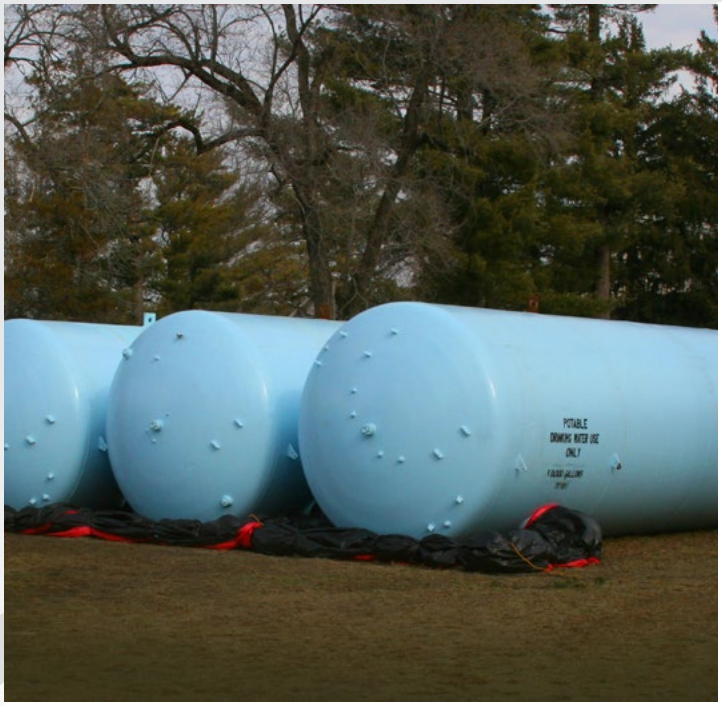
MUNICIPAL & UNDERGROUND UTILITY SOLUTIONS

At COLT, we understand the challenges of providing the safe, uninterrupted flow of water to communities and commercial operations. Whether managing a sprawling municipal network or a critical industrial facility, downtime is simply not an option. COLT delivers decades of specialized water industry experience combined with robust engineering and manufacturing resources to provide contract and emergency services across the country.

WHY COLT?

- Safety and quality are at the core of all operations
- 60+ years of management and field experience in water, wastewater and industrial applications
- OQ qualified, expert-level technicians
- In-house PE and design engineers
- Innovative technological capabilities to solve for every size and scope
- 65K+ sq ft manufacturing hub with strategically located stocking facilities across the U.S.
- 24-hour local response teams



VALVE INSERTION

Install high-performance insertion valves into pressurized lines, providing permanent shut-off points where they are needed most.

- Emergency Repairs
- System Upgrades
- Routine Maintenance
- Installing all valve insertion brands on the market, on lines up to 24"

UTILITY & INFRASTRUCTURE SUPPORT

- Temporary Water Storage
- PCCP Transition & Repair
- 24/7 Emergency Response - stocking line stop sleeves up to 36" and insertion valves up to 24" for emergency situations

WATER & WASTEWATER CONTRACT SERVICES BY THE NUMBERS

- Line stopping from 3/4" - 78"
- Insertion valves from 4" - 24"
- Wet tapping from 1/2" - 48"

LINE INTERVENTION & ISOLATION

Isolate specific sections of a pipeline for repair or modification without shut down of entire network.

- Single and Double Line Stopping
- Line Stop with Bypass
- Pipe Freezing

HOT TAPPING & NEW CONNECTIONS

Allow for new branch connections to be made to live water mains without any loss of product, loss of pressure, or service interruption.

- Add new service lines, fire suppression lines, water and sewer force mains, etc.
- Compatible with all materials: Ductile Iron, PVC, HDPE, Steel, AC, Cast Iron, and PCCP.
