TEMPORARY WATER STORAGE

The **Authority** in **Underground Utility** Pipeline Solutions

WHY COLT?

- Safety and quality are at the core of all operations
- 60+ years of management and field experience in water, wastewater and industrial applications
- OQ qualified, expert-level technicians
- In-house PE and design engineers
- Innovative technological capabilities to solve for every size and scope
- 65K+ sq ft manufacturing hub with strategically located stocking facilities across the U.S.
- 24-hour local response teams

Providing temporary pressurized **potable water systems** for uninterrupted service.

COLT supplies pressurized and atmospheric tanks, along with complete pumping systems. Our high-capacity temporary water storage connects directly to existing lines, supporting maintenance or emergencies without interrupting supply.

MUNICIPAL

When elevated or ground storage tanks need to be taken out of service, COLT keeps pressurized potable water flowing without interruption to the water distribution system.

RESIDENTIAL

Supplying potable storage for emergency and scheduled water outage events. Excellent for large projects and small projects alike.

COMMERCIAL & INDUSTRIAL

COLT's temporary water storage solutions meet potable water standards and satisfy insurance underwriters' fire-protection requirements.
